

# Senior React.js Developer

(Email your resume to [info@dunion.ir](mailto:info@dunion.ir))

## Job Description

We are looking for a great JavaScript developer who is proficient with React.js.

Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

## Responsibilities

- Developing and implementing highly-responsive user interface components using React concepts
- Building reusable components and front-end libraries for future use
- Translating designs and wireframes into high quality code
- Developing and implementing front-end architecture to support user interface concepts
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Documenting application changes and developing updates

## Skills

- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model, CSS, HTML and front-end languages
- Thorough understanding of React.js and its core principles
- Experience with popular React tools including React.js and workflows (such as Flux or Redux)
- Experience with data structure libraries (e.g., Immutable.js)
- Knowledge of isomorphic React is a plus
- Familiarity with RESTful APIs
- Experience with user interface design
- Excellent troubleshooting skills
- Knowledge of modern authorization mechanisms, such as JSON Web Token
- Familiarity with modern front-end build pipelines and tools
- Ability to understand business requirements and translate them into technical requirements
- A knack for benchmarking and optimization
- Familiarity with code versioning tools such as Git
